

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): An organic electroluminescent display comprising:
a transparent substrate having an inner surface and an outer surface;
a transparent electrode disposed on the inner surface of the transparent substrate;
an organic EL layer disposed on the transparent electrode;
a back electrode disposed on the organic EL layer; and
a half mirror disposed on the outer surface of the transparent substrate and at a distance from the organic EL layer to display an image that produces a sense of depth,

wherein the transparent electrode is in direct contact with the organic EL layer.

2. (previously presented): The organic electroluminescent display according to claim 1, wherein the half mirror is formed of a thin metal film on the outer surface of the transparent substrate or a surface of a transparent plate that protects the organic electroluminescent display.

3. (previously presented): The organic electroluminescent display according to claim 1, wherein the half mirror is formed of a transparent resin film having a thin

metal film, the transparent resin film attached to the transparent substrate or a transparent plate that protects the organic electroluminescent display.

4. (previously presented): The organic electroluminescent display according to claim 1, wherein a perpendicular distance from a surface of the organic EL layer to the half mirror is equal to or larger than a dot pitch of the display.

5. (previously presented): The organic electroluminescent display according to claim 2, wherein a perpendicular distance from a surface of the organic EL layer to the half mirror is equal to or larger than a dot pitch of the display.

6. (previously presented): The organic electroluminescent display according to claim 3, wherein a perpendicular distance from a surface of the organic EL layer to the half mirror is equal to or larger than a dot pitch of the display.
